Automated Network Request Management in ServiceNow

Overview

Workspace

Kanban

Subtasks (5)

Milestone 1: Catalog Creation

Medium ^

Description

Objective: Establish a structured, user-friendly service catalog for network requests.

- Identify network request types
- Define request catalogs and categories.
- Create service catalog items with clear titles and descriptions.
- Collaborate with network and IT teams for content accuracy.
- Ensure catalog taxonomy aligns with ITSM structure.

Milestone 2: Form Setup

Medium ^

Description

Objective: Design dynamic, intuitive forms that capture all required request data.

- Build catalog item forms using variables.
- Add dynamic behaviours (show/hide fields based on selection).

Phase 2: Backend Development & Configurations

Build and modify items faster with the improved [Catalog Builder](#).

Catalog items are goods or services available to order from the service catalog. Items can be anything from hardware, like tablets and phones, to software applications, to furniture and office supplies.

- Enter a Name and Short description to display for the item.
- Enter a Price, approvals, variables, and other information as needed.
